

Nokia E72 Exchange Email Setup

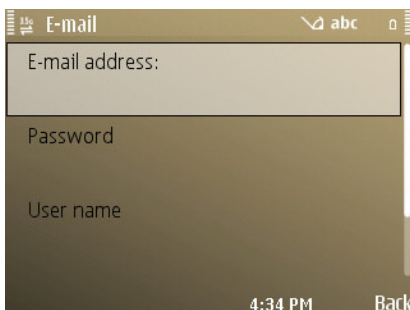

In preparation for configuring Email through your Company Exchange Server, you will need to acquire the **Exchange Server Address** and **Domain Name** from your IT department.

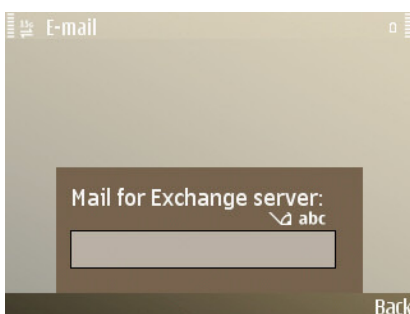

- From the Home Screen, select **Set up e-mail**, then **Start e-mail setup**
- Press **Start**

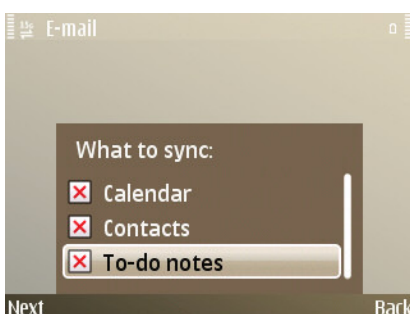

- Scroll and select **Mail for Exchange**
- Press **OK** or **Yes** on all notifications until Mail for Exchange has installed (you may experience short delays between notifications while it loads)

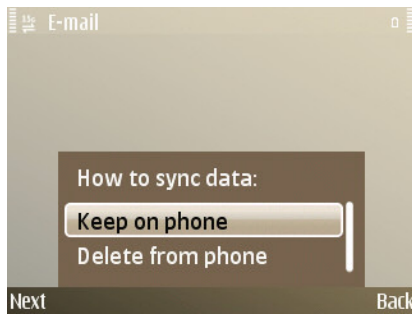

- In this screen, enter your **Email Address, Password, Username** and **Domain**
- Note: your Username and Password are the same as the Username and Password used to log onto your PC
- Once Complete, press **Next**

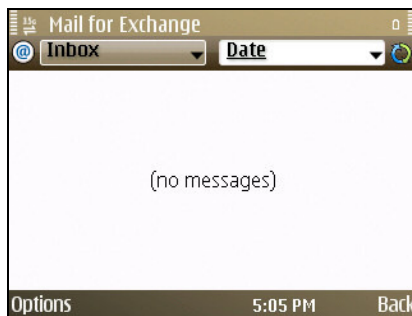

- Press **OK** then enter your company **Mail for Exchange Server** name (eg. "webmail.company.co.nz")

- Select what you wish to synchronise with and press **Next**

- Select **Keep on phone**
- Select **Internet** as a connection

- If you don't see a green and blue synchronisation icon at the top right of your screen, press **Options > Send and receive now**
- Wait 30 seconds, and it should display new email
